

450SR

The 450SR is a linear output, with 0-100km acceleration at less than 5s, comparable to 600cc power level. A “super-car” outlook created through wind tunnel testing and the aesthetics in the service of performance. This model is a strongly sporty set-up with superb track limits and track configuration with professional racing front and rear gears and anti-drop parts. 450SR has intelligent man-machine interaction with TFT display and T-BOX.
